» PRODUCTS & SERVICES

Pneumatic Waste/Laundry Collection System (PWLCS)

Greenvac PWLCS is an ideal way to transfer soiled linen and solid waste (of any kind) from the source to a centralized collection inside or outside the building. A network of tubes (400mm/500mm) runs throughout the building both vertically and horizontally and also in public areas of the facility. Multiple buildings can be easily connected with this system reducing operation time and increasing efficiency and hygiene.

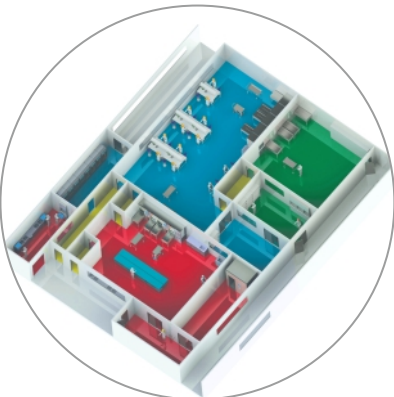

Bio-Medical Waste Treatment System

Med Freshe Integrated Sterilizer and Shredder (ISS) is a very compact and fully automated microprocessor based machine for sterilizing and shredding bio medical waste in one chamber itself. The treatment cycle is 30mins in which the original volume is reduced by 80% and the 20% remain is unrecognizable waste which can be given to the municipal corporation as non-infectious waste. Operationally it is very easy to use and emits no fumes. It's a very ideal solution for a hospital and is very compact (approx., 6 x 7 x 7 feet).

Pneumatic Tube System (PTS)

Greenvac PTS for transfer of samples, medicines, blood bags, etc. We provide complete design and turnkey solutions for Pneumatic Tube System for samples, documents, industries samples (HOT Samples 500 c.), etc.

Central Sterile Supply Department (CSSD) / Theatre Sterile Supply Department (TSSU)

We do complete planning, designing, furnishing, commissioning and service of CSSD/TSSU on turnkey basis.

Modular OT/ICU/ER

We build entire Modular OT / OT block on turnkey basis. This includes OT Block planning, fabrication, furnishing and commissioning. We provide OT Panels of SS, Glass, SMS, HPL, GI etc.

OT Integration

We provide complete OT Integration and Audio/Video solutions for OTs or other areas of hospitals.

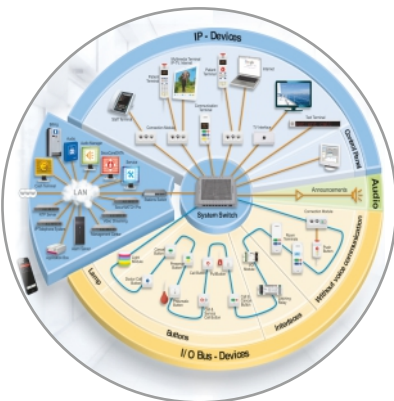

Medical Gas Pipeline System (MGPS)

We specialize in complete planning, designing, furnishing and commissioning of MGPS. We comply with HTM/ DIN/ ISO/NFPA Standards.

Oxygen Generation System (OGS)

Oxygen Generator System works on the principle of Pressure Swing Adsorption, widely termed as PSA. This conventional gas separation technology is being used to separate Oxygen from Compressed air. The major components are a pair of adsorbent vessels, Surge tank, Switching valves, Intelligent PLC, Oxygen analyzer and instruments.

Nurse Call System (NCS)

We do complete planning, designing, furnishing and commissioning of the NCS on turnkey basis.

Automated Inventory Management Systems (AIMS)

Greenvac Automated Inventory Management Systems (AIMS) consists of Computer Controlled & PLC based stacker crane driven system for automatically placing & retrieving materials from defined storage locations.

Burns Ward & Equipment

We do complete planning and furnishing of the burns ward on turnkey basis. We partner with various leaders from Europe for their products and technologies. We also supply specialized Burns equipment like shower Trolley, Burns tank, Patient lifting systems, etc.

Hospital Furniture

We provide a complete range of patients care furniture.

OT Table / OT Lights / OT Equipment

We provide a large range of OT Lights, OT Tables & OT Equipment like Ventilators, Monitors, Infusion Pumps, Defibrillators, Anesthesia Machine, Pulse Oximeter, Etc.

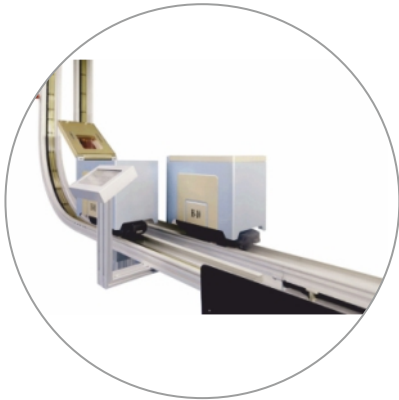

Curtain Track / IV Track / Wall Guard

We provide a complete range of Curtain Track / IV Track system and wall guard. We offer a unique blend of properties-innovative design, practical effectiveness and rugged reliability.

Smart Bin System (SBS)

Greenvac Smart Bin System (SBS)'s ability to compact waste, check waste location wise, provide on time activity statistics, generate past records etc. makes GVS SBS truly SMART system for waste management.

Electric Track Vehicle (ETV)

We provide Electric Track Vehicle which is the most advanced transport solution for hospitals. It is perfect system for quick and reliable transportation between operation theatres, laboratories, pharmacies and general rooms in hospitals.

Automated Pharmacy Dispensing System (APDS)

We provide Automated pharmacy dispensing system which is a decentralized medication distribution systems that provide computer-controlled storage, dispensing, and tracking of medications. It improve efficiency and patient safety, and they are now widely used in many hospitals.

Municipal Solid Waste / Legacy Waste Treatment

Greenvac's newly invented (Torrefaction Technology) pre-process the Legacy Waste to produce RDF – Refuse Derived Fuel and further convert the RDF into Coal Powder.

Our Solutions:

- Pneumatic Waste & Laundry Collection System (PWLCS)
- Bio-Medical Waste Treatment System (ISS)
- Pneumatic Tube System (PTS)
- Central Sterile Supply Department (CSSD)
- Modular OT / ICU / Emergency Room / OT Integration
- Medical Gas Pipeline System (MGPS)
- Oxygen Generation System (OGS)
- Nurse Call System (NCS)
- Automated Inventory Management Systems (AIMS)
- Burns Ward & Equipment
- Hospital Furniture / OT Table and OT Lights / OT Equipment
- Curtain Track / IV Track / Wall Guard
- Smart Bin System (SBS)
- Electric Track Vehicle (ETV)
- Automated Pharmacy Dispensing System (APDS)
- Municipal Solid Waste / Legacy Waste Treatment
